

Wikipedia Market Intelligence Report

Topic: Meditation · Language edition: de.wikipedia · Analysis period: 2023-09 to 2026-08

1. Recommendation

Monitor before spending on validation.

- Meditation · de.wikipedia: 56,910 views a year; -17.2% year over year, against -7.3% for the whole edition: 10.6% worse than the edition as a whole.
- Timing: attention to Meditation · de.wikipedia peaks in January (1.29× the average month), so plan launches and campaigns ahead of it.
- For Meditation · de.wikipedia, momentum is accelerating: the last 3 months changed +3.1% on the 3 before, after a weaker 3 months before that. The latest flagged month (2026-08, +40.5% against its baseline) is provisional, so confirm the rise before relying on it.
- Related topics to explore next: Yoga *.
- Larger context around the topic: Buddhismus.
- Related topics falling faster than the edition: Transzendente Meditation, Zazen, Ensō, Entspannungsverfahren, Lectio divina and 1 more.
- * found by text similarity only, not a stated relationship.

Basis: Wikipedia reader attention only, not revenue or product demand. This is not a go/no-go or investment call: before committing budget, confirm with search volume, app-store demand and customer interviews.

Rule: validate first = at least 12,000 views a year and a year-over-year change within 10% of the edition's (share-adjusted) or better; deprioritise = under 12,000 views a year, or 25% or more behind the edition; monitor = the rest.

2. KPI Breakdown

KPI	Value	Reading
Demand (views, last 12 months)	56,910 (4,742 a month)	low. 56,910 views in the last 12 months; low is 12,000 to under 60,000. This is absolute: larger editions reach more readers.
Growth (year over year)	-17.2%	against -7.3% for the whole edition: 10.6% worse
Growth (3-year CAGR)	-15.1%	declining. 3-year CAGR -15.1%; declining is under -3.0% a year. For context, de.wikipedia as a whole changed -7.3% year over year.
Momentum (last 3 months)	+3.1% against -10.1% before	accelerating. Last 3 months +3.1% against the 3 before them -10.1% (+13.2 points); above +5 points is accelerating, below -5 decelerating, otherwise stable.
Seasonality and stability	peak January (1.29×), trough July	moderately seasonal. The peak month, January, is 1.29x the average month; 2 flagged months out of 36, in 2 separate episodes. From 1.12x the topic is moderately seasonal, from 1.30x highly seasonal.
Localization	6.7 views per million edition views	not computed (Only defined across several editions: run compare with the languages to compare.)
Anomalies	2 flagged	2025-11 +43.3%; 2026-08 +40.5%, provisional; cause unknown
Data quality	HIGH	full coverage, confident topic match, at least two years of data

Five separate signals, each from one written rule. They are evidence for a human decision: they are not combined into a score and are not a recommendation to buy or invest.

Key observations

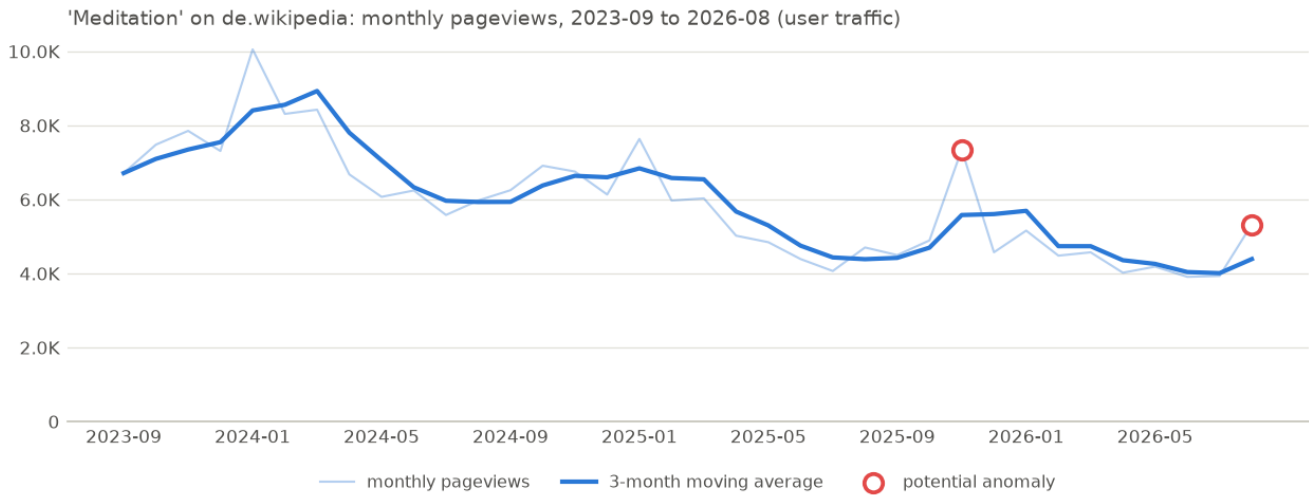

- Annual pageviews (2025-09..2026-08) were 56.9K (about 4.7K a month).
- Pageviews decreased 17.2% year over year (2025-09..2026-08 vs 2024-09..2025-08).
- Three-year CAGR was -15.1% (vs 2022-09..2023-08).
- The last 3 months were +3.1% against the previous 3 months; momentum accelerating.
- 2 potential anomalies flagged; the largest was +43.3% against its baseline in 2025-11 (cause unknown). With the flagged months replaced by their expected values, the year-over-year change would be -22.7%.

3. Topic Definition

Canonical topic	Meditation
Wikidata ID	Q108458
Article used	Meditation (page ID 28837)
Resolution method	exact title
Resolution confidence	0.98
Language mappings	de: Meditation
Related topics	n/a

4. Demand

KPI	Value
Annual views (last 12 months)	56,910
Monthly average	4,742
Daily average	156
Views in the requested period	212,328
Unique devices	n/a (unsupported: Wikimedia publishes unique devices per project (whole language edition) only, never per article.)
Views per unique device	n/a (unsupported: Wikimedia publishes unique devices per project (whole language edition) only, never per article.)

5. Growth

KPI	Value
YoY (last 12M vs previous 12M)	-17.2%
3Y CAGR	-15.1%
Last 3M vs previous 3M	+3.1%
Previous 3M vs the 3M before	-10.1%
Acceleration	+13.2 pp (accelerating)
Requested period vs previous equivalent period	-37.1%

These are historical measurements, not forecasts. A growth chart is planned for a later milestone; the Demand chart shows the trend.

6. Seasonality

KPI	Value
Peak month	January
Trough month	July
Peak / average	1.29
Trough / average	0.77
Volatility (coefficient of variation)	0.25

Basis: calendar-month means over 2023-09..2026-08 (3 observation(s) per month).

7. Language Opportunity

n/a (unavailable: Only defined across several editions: run compare with the languages to compare.)

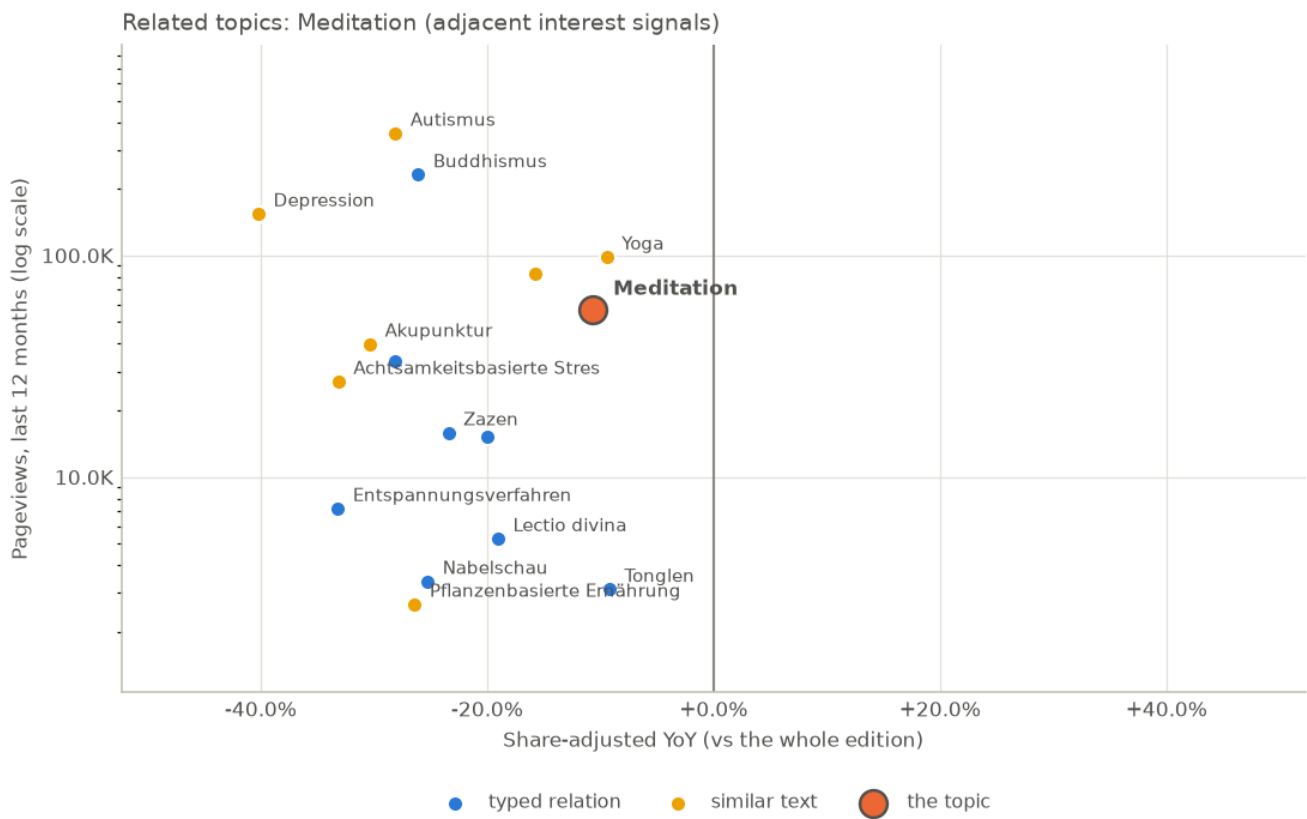

8. Localization

Metric	Value
Wikipedia topic penetration	6.7 per million edition views
Topic affinity	n/a (unavailable: Only defined across several editions: run compare with the languages to compare.)
Country distribution	n/a (unsupported: Wikimedia publishes country-level pageviews per project (top-by-country), not per article, so a topic's country distribution cannot be measured.)

A language edition is not a country: de.wikipedia is read wherever that language is read.

9. Topic Ecosystem

Related concepts found through typed Wikidata relations (broader, narrower, facets) and, separately, through text similarity. Each is an adjacent interest signal: where readers' attention sits around the topic, not a claim that it is a commercially adjacent product. Share-adjusted YoY compares each topic with its whole edition, whose views changed -7.3% year over year.

Topic	Relations hip	Annual views (last 12 months)	Size vs topic	YoY	Share-adjusted YoY	Signal
Meditation	—	56,910	1×	-17.2%	—	—
Autismus	similar text	356,236	6.26×	-33.4%	-28.1%	declining category
Buddhismus	facet of	231,326	4.06×	-31.5%	-26.1%	larger category
Depression	similar text	154,215	2.71×	-44.6%	-40.2%	declining category
Yoga	similar text	98,454	1.73×	-16.1%	-9.4%	adjacent opportunity
Hatha Yoga	similar text	83,112	1.46×	-22.0%	-15.8%	declining category
Akupunktur	similar text	39,847	0.70×	-35.5%	-30.3%	declining category
Transzendente Meditation	narrower	33,415	0.59×	-33.4%	-28.1%	declining category
Achtsamkeit (Geistesgegenwart)	similar text	33,406	0.59×	n/a	n/a	adjacent interest
Achtsamkeitsbasierte Stressreduktion	similar text	27,008	0.47×	-38.0%	-33.1%	declining category
Zazen	narrower	15,858	0.28×	-29.0%	-23.4%	declining category
Ensō	narrower	15,132	0.27×	-25.8%	-20.0%	declining category
Entspannungsverfahren	broader	7,210	0.13×	-38.1%	-33.2%	declining category
Lectio divina	narrower	5,274	0.09×	-25.0%	-19.0%	declining category
Nabelschau	narrower	3,385	0.06×	-30.7%	-25.2%	declining category
Tonglen	narrower	3,116	0.05×	-15.9%	-9.2%	adjacent interest
Pflanzenbasierte Ernährung	similar text	2,669	0.05×	-31.8%	-26.4%	declining category
Wirkungen der Meditation	similar text	1,625	0.03×	n/a	n/a	adjacent interest
Daoistische Meditation	narrower	799	0.01×	-31.3%	-25.9%	too small to judge
Pränatal-Yoga	similar text	137	0.00×	-55.1%	-51.5%	too small to judge
Rosenkranzgeheimnisse	narrower	133	0.00×	+23.1%	+32.9%	too small to judge

Signals (descriptive, not recommendations):

- **larger category:** a broader concept with more views than the topic
- **emerging category:** gaining at least 10% relative to its edition
- **declining category:** losing at least 10% relative to its edition
- **adjacent opportunity:** at least as many views as the topic; its change is within 10 points of its edition's (it may still be falling)
- **adjacent interest:** fewer views than the topic; its change is within 10 points of its edition's (it may still be falling)
- **too small to judge:** under 100 views a month: any change is mostly noise

Interest concentration

Share of the cluster's views held by its largest articles. The cluster is the topic plus its typed relations (11 articles); text-similar articles are left out.

Top 1	Top 5	Top 10	Top 20
62.1%	94.7%	100.0%	n/a (fewer than 20 articles)

Largest article: Buddhismus (62.1% of the cluster's views).

High concentration means attention sits on a few concepts; low means it is spread across many. Neither is good or bad in itself.

1 broader concept(s) have no article in this edition and were skipped. 7 narrower concept(s) have no article in this edition and were skipped. 3 has facet concept(s) have no article in this edition and were skipped. Text similarity can include unrelated articles that share vocabulary.

10. Anomalies

Months far from their expected value. Expected = the median of the 6 months before and after, times the usual seasonal factor for that calendar month (from other years), so recurring seasonal peaks are not flagged. Flagged when the robust z-score exceeds 3.5 and the gap is at least 25.0%. Causes are not investigated.

Month	Actual	Expected (baseline)	Change vs baseline	Robust z	Severity
2025-11	7,348	5,127	+43.3%	5.5	medium
2026-08	5,328	3,792	+40.5%	5.2	medium, provisional (recent month: the next data can change it)

- Potential anomaly detected: 2025-11 pageviews were 43.3% above baseline. Cause: unknown.
- Potential anomaly detected: 2026-08 pageviews were 40.5% above baseline. Cause: unknown.

YoY with flagged months replaced by their expected values: -22.7% (reported YoY: -17.2%).

11. Data Quality

Source	Wikimedia Analytics API (https://wikimedia.org/api/rest_v1/metrics/pageviews/per-article), access=all-access, agent=user
Data retrieved	2026-09-27T12:36:28+00:00
Report generated	2026-09-27T12:36:33+00:00 (software 0.1.0)
Coverage	100.0%
Missing data	none
Topic resolution confidence	0.98
Unique devices available	no
Country data available	no
Project-level denominator available	yes
API errors	none
Quality level	HIGH: full coverage, confident topic match, at least two years of data

Metrics not computed:

Metric	Status	Reason
demand.unique_devices	unsupported	Wikimedia publishes unique devices per project (whole language edition) only, never per article.
demand.views_per_unique_device	unsupported	Wikimedia publishes unique devices per project (whole language edition) only, never per article.
localization.country_distribution	unsupported	Wikimedia publishes country-level pageviews per project (top-by-country), not per article, so a topic's country distribution cannot be measured.
localization.topic_share	unavailable	Only defined across several editions: run compare with the languages to compare.
localization.topic_affinity	unavailable	Only defined across several editions: run compare with the languages to compare.
signals.localization	unavailable	Only defined across several editions: run compare with the languages to compare.

Raw responses: [data/raw/wikimedia/pageviews-per-article/20260927T123628_2b682df09582.json](#),
[data/raw/wikimedia/pageviews-aggregate/20260927T123628_c49dec8c1d36.json](#)

12. Business Implications

What the data supports

- Annual pageviews (2025-09..2026-08) were 56.9K (about 4.7K a month).
- Pageviews decreased 17.2% year over year (2025-09..2026-08 vs 2024-09..2025-08).
- Three-year CAGR was -15.1% (vs 2022-09..2023-08).
- The last 3 months were +3.1% against the previous 3 months; momentum accelerating.
- 2 potential anomalies flagged; the largest was +43.3% against its baseline in 2025-11 (cause unknown).
With the flagged months replaced by their expected values, the year-over-year change would be -22.7%.
- These figures describe reader attention to one Wikipedia article in de.wikipedia.

What the data does NOT establish

- Revenue, market size (TAM) or willingness to pay: pageviews measure attention, not purchasing.
- Product-market fit, or that a product on this topic would succeed.
- Causes of any change: the data shows that traffic moved, not why.
- Country-level demand: de.wikipedia readers are not one country's population.
- That readers of related articles, or of other language editions, share this trend.

Questions requiring further validation

- Does search volume (e.g. Google Trends) show the same direction in this language?
- Is there App Store / Google Play demand for products on this topic in this language?
- What do competitors in this category earn, and how large is the addressable market?
- Will people pay? What do customer interviews and landing-page conversion rates show?
- What would customer acquisition cost, retention and monetization look like?
